

## ENSURE360 MOTION SENSOR

Motion Sensor transmitter, from Sentricks, is the stand-alone motion detector for the Ensure360<sup>SM</sup> platform. Anytime a person or object moves in its view, it detects the motion in the Ensure360 system. You can mount the Motion Sensor anywhere in a room or hallway using either the included flat or angled mounting brackets. It includes an LED, which you can enable for installation, and set to off for normal usage.

### Installation Instructions

1. Remove Motion Sensor from packaging
2. Determine the mounting location
3. Secure the desired mounting bracket to the wall using the included screws
4. Open the battery door on the front of the Motion Sensor and pull out the battery tab; re-attach the battery door
5. Slide the Motion Sensor completely onto the selected mounting bracket

### Parts

- Motion.Carbon - Motion transmitter for Ensure360 platform, which includes complete transmitter, an installed battery, and both the flat and angled mounting bracket (with screws)
- 301906 - 5pk 2450 batteries

### Technical Specifications

### Specifications

**Dimensions:** 3.30" x 1.80" x 0.91"

## **ENSURE360 MOTION SENSOR**

LED Patterns:

- Motion Sensor transmitting a signal - Blue flash
- Motion Sensor being updated - Green and yellow flash

Supervision interval - 15 minutes

Estimated battery life - Two years or longer

### **THE ENSURE360 SOLUTION**

Ensure360 is the perfect combination of Real-Time Location System (RTLS), environmental sensors, wearables, motion detectors, and traditional emergency call equipment designed to create a bubble of protection for your residents. The system, comprised of: a Headend server, a Desk console, a wireless mesh network made up of Extender access points, the Director network coordinator, and an array of Locator location beacons, will communicate with various end devices around the community to create a modular system to fit your needs! The end devices for Ensure360 include: the Pendant for tracking resident and staff location and providing a way to call for help from anywhere, the corded Pull Station, the touch pad Push Station, the Universal Transmitter with 2 dry contacts, and the Motion Sensor. Ensure360 will provide you with the most powerful emergency call system you've ever used.
