

SCS-01

The SCS-01 is a surface mounted emergency call pull cord station. It mounts directly to the wall or can cover a single gang opening. The station features a pull cord for emergency calls and a check mark restore button for easy operation. An EN1941 wireless transmitter is included. The pull cord station is durable and easy to clean.

The SCS-01 can also function as a Courtesy Check-In switch as well. The restore button can serve two functions, restoring alarms when the emergency call pull cord has been pressed or activating Courtesy Check-In if the emergency touch pad has not been pressed.

Specifications:

Dimensions: 3 3/16" W x 5" H x 1 3/16" D

Switch: Momentary call switch provides reliable actuation

Avoid mounting switches over towel racks, tissue roll holders or electrical outlets.
